

Basic Epidemiology for Tuberculosis Program Staff, 2nd Edition

32547 **Author:** Passannante, M.; Sevilla, A.; Ahamed, N.; Global Tuberculosis Institute at Rutgers The State University of New Jersey

Publication Date: 2013

Country of Origin: United States

Format: Manual

Physical Description: 118 p.: col.; appendices, graphs, refs., tables.

Language: English

Abstract:

The new edition of this guide provides a background on basic epidemiology for TB program staff, as well as descriptions of how these concepts can be put to practical use. In addition to basic epidemiology for tuberculosis, this guide contains information on epidemiologic and statistical techniques that are used in research studies and a chapter on TB genotyping. The information in this guide will assist in analyzing data, assessing current and evolving trends in TB morbidity, identifying risk groups and determining where to allocate staff and resources.
